

**Title:** App Developer

**Location:** Brick, New Jersey

**Position Description:**

We are looking for a passionate, self-driven, and experienced mobile app developer to join our small, high-powered team to produce both IOS and Android mobile applications that are both good looking and easy to use. You will be creating mobile applications that communicate with REST API functions that are implemented by other members of the team. An in-house design team will assist you with screen layouts, images and flow. You should be familiar with tools and techniques that allow you to create a single code-base that can run on both IOS and Android without any major rework.

**Responsibilities:**

Thorough knowledge of how to package and publish mobile apps is required. You should be comfortable using a distributed source code control system such as Git. You will be joining our small development team in Brick, NJ, dedicated to making National Retail Solutions a successful business unit and expected to work independently and contribute to overall architectural and design discussions.

**Qualifications:**

A minimum of 5 years of programming experience is required, with a minimum of 2 years in mobile app development, as is a degree in Computer Science or related field.

To apply for this position, please e-mail your resume to [susan.nankivell@idt.net](mailto:susan.nankivell@idt.net).
